

Westchester County Mobility & Transit Plan

Improving Mobility

Westchester County is embarking on a study to better align the county's mobility network with the needs of its residents, workers, and visitors. This study will examine the region's transportation systems, demographics, employment trends, mobility conditions, and other factors to understand how well the network matches existing travel needs, and identify opportunities to strengthen it and meet future needs.

How Will We Get There?

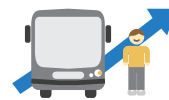

Project Timeline

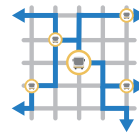

The Westchester County Mobility & Transit Plan began in Spring 2020 and will be completed by Summer 2021.

Our Goals

Design a **high-performing, reliable, and easy-to-understand** transportation system.

Create a suite of **service options** for Westchester's many travel markets.

Provide an **equitable and socially just** transportation network for all users
